

Super Sorting Pie

- **Fruit Salad:** How many fruit pieces can you fit into one section of the pie? Make your best guess and try it! Use as many combinations of fruit as you need. Which combination produced the greatest total? Which combination filled the section in the fewest number of pieces? Why do you think so?
- Play **“What’s Missing?”** to develop thinking and memory skills. Place four or five fruits in a line. Have your child turn away while you remove one of the fruits. When your child turns around, have him or her determine which fruit is missing.
- Make **word cards** to correspond with the fruits in this set. Have children match each fruit with the correct word card. If children are not ready for whole words, make cards featuring the beginning letter sounds only.
